

Guide for License registration and Software activation

The purpose of this guide is to give users all necessary information on how to register a license and activate **Cabri Geometry II Plus for Windows** (1.3 version or newer).

Once Cabri Geometry II Plus has been launched (Setup.exe or install_cg2p_1_3_eval_fr.exe) - but not yet activated - **all software functions are available for a period of 72 hours** beyond which the software will run in a "Demonstration" mode, with SAVE, PRINT and EXPORT functions disabled.

To follow the steps described below, the software must have been previously installed as a standalone or server - not as a client - application.

If the user has a valid **Purchase Serial Number**, the corresponding license must be registered to activate the full functions of the software.

If the user does not have a **Purchase Serial Number**, a one-month full evaluation license can be obtained instead.

In all other cases, refer to *Other Registration* methods below.

Contents:

- 1 - Full registration of your new Cabri Geometry II Plus software (using the Internet)**
- 2 - Registration of the full, one-month evaluation license (using the Internet)**
